#### ISCD's 2024 Virtual Clinicians Symposium Advancing High Quality Musculoskeletal Assessment - Past, Present and Future April 20 - 21

The International Society for Clinical Densitometry is proud to present the 2024 Clinicians Symposium. This **virtual symposium** will offer up to 16 hours of ACCME accredited education from national and international leaders in bone health. Covered topics will include artificial intelligence in radiographic imaging, rare bone diseases, transplantation osteoporosis, bone optimization in spinal surgery patients, future directions in osteoporosis care, and many more interesting topics. This symposium targets clinical providers who seek to better serve and care for their patients with bone diseases.

This activity is targeting 16.0 AMA PRA Category 1 Credits™.

Saturday, April 20th

**Restrictive Eating Disorders and Bone Health** Sat, Apr 20 at 9:00 am EDT

**WATCH SESSION**

**OVERVIEW**  
This talk will review the spectrum of restrictive eating disorders, associated nutritional deficiencies, and their association with bone health in adolescents and young adults.

**OBJECTIVES**

1. To review the criteria for common restrictive eating disorders.
2. To outline associated nutritional deficiencies and their clinical manifestations.
3. To discuss the mechanisms of bone loss in these young patients and outline a general management approach.

**SPEAKER(S)**  
Catherine M. Gordon, MD, MS, CCD, Clinical Director and Senior Investigator
